

## Objective & Strategy

The Fund aims to provide a return of capital growth and income by seeking out the best investment opportunities within the US short term fixed income universe. Mirabaud - Global Short Duration was previously known as Mirabaud - US Short Term Credit Fund. The name change was effective as of 24/07/2020. As at 17/08/2020, the fund strategy changed its investment universe from US short term to global short term fixed income.

## Investment Manager

Andrew Lake joined Mirabaud as Head of High Yield in January 2013. Prior to this he was Head of High Yield Portfolio Management at Aviva Investors. Mr Lake has been involved in the high yield market since 1998 during which time he has managed funds at Merrill Lynch Investment Managers where he was responsible for high yield in London and F&C Investments where he co-managed the institutional high yield product. Mr Lake has a history degree from the University of York, an M.B.A from the Booth School of Business at the University of Chicago and is a qualified barrister.

## Risk Information

Investments in debt securities are subject to interest rate, credit and default risk. The fund may invest in emerging markets that may be more volatile and generate higher operational risks than equity markets of well established economies. The fund may invest in lower rated securities that are subject to higher credit risk and are more volatile than higher rated securities. The fund may invest in asset backed instruments that would lose their value if their underlying assets value was to diminish or if their issuer was to default and be unable to meet its contractual obligations. The fund may invest in securities that are less liquid because buyers/sellers are not always in sufficient numbers to trade these securities readily. Financial derivative instruments may be used as part of the investment process, which may increase the fund volatility and expose the fund to the risk of default of its counterparties. Currency forwards will be used to reduce the currency risk generated by investments in share-classes or instruments that are not denominated in the fund base currency. The effectiveness of that hedging process will be subject to counterparty and operational risk. Cash placed in time deposits or money market funds are exposed to their issuer default risk.
